## BAR MODELLING GUIDANCE

## Maths Knowledge and Skills Progression

At Our Lady and St. Hubert's, home, school and parish work together, knowing that God is with us in all we do.

OUR LADY AND

## Single bar model

| I. Concrete resources | $4+6]=10$ | EYFS and YI |
| :---: | :---: | :---: |
| 2. Substituted concrete resources (counters, cubes, multi-link cubes) |  | EYFS and YI |
| 3. Pictorial representation |  | YI |
| 4. Discrete bar model |  | Y 1 and Y 2 |
| 5. Continuous bar model |  | Y2 and KS2 |

## Addition

## Part whole bar models

Jack has 6 red cars, Ellie has 2 blue cars. How many scoops do they have altogether?

## Discrete bar model

$\square$

## Continuous bar model

$\square$

## Subtraction

Reduction - take away
Jack has 9 cards and sells 4 . How many does he have left?

$$
9-4=5
$$

## Partitioning - part whole

Jack has 9 cards, 4 of them are red, the rest are blue. How many are blue?

## Completion

A jar contains 15 marbles. Jack has 7 marbles. How many more does he need to collect to complete the jar?
15

$$
15-7=8
$$

## Multiplication

Eggs come in boxes of 6, Jack buys 6 boxes. How many eggs does Alex have?

## Division

Sharing
Ellie has 25 stickers. She shares them between 5 friends. How many stickers will each friend receive?

## Grouping

Ellie has 25 tennis balls. Each tube holds 5 tennis balls. How many tubes are needed to hold all the tennis balls?

## Unit fractions

## Fractions of a quantity

Ellie has 25 marbles. She gives away $\frac{2}{5}$ of her marbles. How many does she have left?

## Comparison bar model

Difference
Jack has 9 pizza slices, Ellie has 3 . How many more cupcakes does Jack have then Ellie?
$\square$

## Total problems

Ellie buys a pair of shoes and a coat. The shoes cost $£ 22$ more than the coat. The total cost of the shoes and coat is $£ 84$. How much does each item cost?

## Problems

## Fraction problems

There are 24 coloured cubes in a box. Three quarters of the cubes are red, four of the cubes are blue and the rest are green.
How many green cubes are in the box?

## Multiplication problems

Jack has 3 cars. Car A weighs twice as much as car B. Car C weighs 12 g more than car A . The total weight of all 3 boxes is 77 g . What does car C weigh?

## Complex problems

David has half as many pens as Jack. Jack has I/3 as many pens as Sarah. Sarah has 84 more pens than Jack. How many pens are there in total?

## Ratio

For every 2 scoops of strawberry, there are 3 scoops of vanilla.

| $\vee$ | $\vee$ | $C$ | $C$ | $C$ |
| :---: | :---: | :---: | :---: | :---: |

## Ratio - sharing

Peter and Jane share $£ 240$ in the ratio 3:5. How much do they each get?

## Ratio - given a part

Jack and Ellie share the money in the ratio $3: 5$. Peter gets $£ 240$. How much did they each share?

## Ratio - given the difference

Ellie and Jack share the money in the ratio 3:5. Ellie gets $£ 240$ more than Jack. How much did Ellie get?

J | 120 | 120 | 120 |
| :--- | :--- | :--- |

| 120 | 120 | 120 | 120 | 120 |
| :--- | :--- | :--- | :--- | :--- |

## Solving equations

$$
3 a+5=17
$$

$17-5=12$
$3 \mathrm{a}=12$
$\mathrm{a}=4$
$3 a+2=2 a+8$

$$
3 a=2 a+6 \quad a=6
$$
