

Good morning children (and parents!).

We've attached some resources that we'd like you to complete today as you work from home. There are some reading, grammar and maths activities that will help support your progress towards your SATS and we've also included a module on computer science where you create your own 'Flappy Bird' game in Code.org (you won't need a login for this module!). You are not limited to these activities – if you'd like to pursue more then please do. We do also want you to complete an assessment on maths.co.uk – your logins were printed out and placed inside your homework books.

Enjoy the snow today – if you can prove you built a snowman that's taller than Mr Wheelan then you *definitely* deserve a prize!

God bless and see you on Monday,

Mr Wheelan and Mr Jay

Reading

[IXL - Use actions and dialogue to understand characters \(Year 6 English practice\)](#)

[IXL - Draw inferences from a text \(Year 6 English practice\)](#)

English
